

Company policy

The primary goal of **Lead automation** is high level of services, environmental protection and improvement of occupational health and work safety. These are essential requirements for keeping regular customers and gaining new ones. Our goal can only be achieved by the quality of work of all employees and the company as a whole.

The management of the company has adopted the following policy:

1. The quality of work depends in particular on the quality of the staff who take full responsibility for the services provided.
2. All employees of the company are responsible for improvement of the quality of services.
3. Close attention is paid to the education and training of all employees of the company.
4. In accordance with the policy, the company issues targets for each year.
5. The integrated management system shall be regularly reviewed in order to improve products, services and to maintain the quality of the processes and the system itself.
6. To implement measures in order to minimize energy consumption, pollution and waste and save natural resources as much as possible.
7. To ensure monitoring and compliance with legislative and other requirements that are related to the environment and health and safety.
8. To motivate all employees of the company and suppliers by environmental behavior and compliance with health and safety requirements.
9. To establish necessary technical, organizational, financial and personnel requirements for a safe work climate, the environment and the quality of products and services.
10. To support the region where we operate in the context of environmental improvement.
